

Deltek Costpoint Partner

Costpoint Contract Management

Costpoint Contract Management simplifies tracking financial and non-financial contract activities, FAR/DFARS clauses, modifications, supplements, and provisions. Integrated with GovWin IQ, it streamlines government contract management by reducing data entry, automating processes, and offering a simplified solution for contract managers.

Benefits Include:

Contract Lifecycle Management

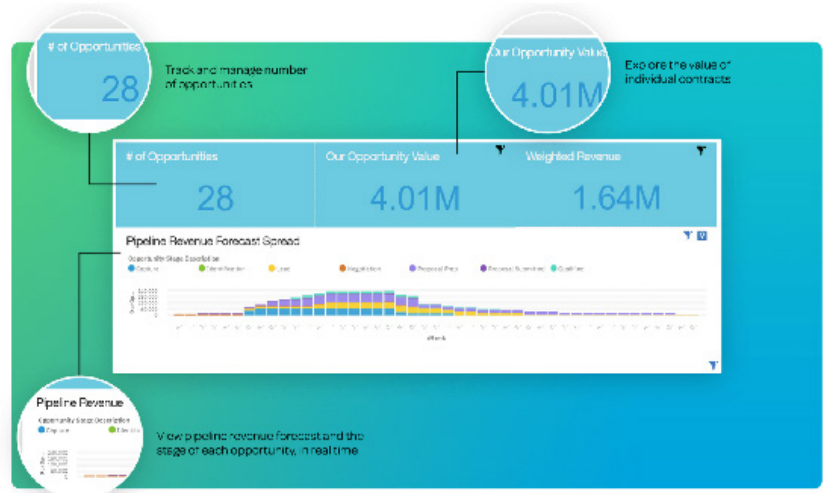

Streamline your workflow from opportunity to project with one integrated system. Enter data once and automate the flow for improved data accuracy and time efficiency.

Seamless Subcontract Management

Streamline data entry and simplify FAR/DFARS clauses. Stay informed about excluded vendors with integrated CPSR assistance.

Simplify Data Calls

Integrated contract management offers contracts and procurement teams the ability to track data in real-time.

PCI's Contract Management Implementation Includes:

Configuration

PCI will set up the system according to your company's needs and provide training for your team on configuring updates.

Training

Experience personalized interactive training across all modules.

Data Loading

If needed, we can assist with loading your data.

Reports

PCI offers customized report options through MS Word or COGNOS.
